*30-Day SEC Yield: 30-Day SEC Yield (Standardized Yield) is an annualized yield furnished by the Fund's custodian that is calculated by dividing the investment income earned by the Fund less expenses over the most recent 30-day period by the current maximum offering price.

**12-Month Trailing Yield: The yield an investor would have received if they had held the ETF over the last 12 months stated as a percentage of the net asset value per unit on the last business day of the most recent month end.

Investment Objective

The Horizons S&P 500[®] Covered Call ETF (HSPX) seeks investment results that, before fees and expenses, generally correspond to the performance of the S&P 500 Stock Covered Call Index[™] (the "Index").

The Index consists of long positions in the stocks of the S&P 500[®] Index and corresponding short (written) call options on option-eligible stocks in the S&P[®] 500 Index. The call options are written out-of-the-money, whereby the exercise (or "strike") price of the option is above the market price of the stock. HSPX invests at least 80% of its total assets in securities that comprise the Index. HSPX is sub-advised by Horizons Investment Management (USA) LLC.

Before fees and expenses.

Previous 12 Month Distributions (%)

The Fund typically earns income dividends from stocks and interest from options premiums. These amounts, net of expenses, are typically passed along to Fund shareholders as dividends from net investment income. The Fund realizes capital gains from writing options and capital gains or losses whenever it sells securities. Any net realized long-term capital gains are distributed to shareholders as "capital gain distributions." *HSPX collects dividends from the S&P 500 Index companies and monthly options premium from selling single stock options on companies in the S&P 500 index, and portions have been passed to shareholders as monthly distributions. Portion of the distribution may include a return of capital. These do not imply rates for any future distributions. The ETF is not required to make distributions.

Horizons ETFs is a member of Mirae Asset Global Investments. Commissions, trailing commissions, management fees and expenses all may be associated with an investment in exchange traded products advised by Horizons ETFs Management (USA) LLC and managed by Exchange Traded Concepts, LLC (the "Horizons Exchange Traded Products"). The Horizons Exchange Traded Products are not guaranteed, their values change frequently and past performance may not be repeated.

Individual shares of the Horizons-branded exchange traded funds (the "Funds") may be purchased or sold in the secondary market throughout the regular trading day on the New York Stock Exchange through a brokerage account. However, shares are not individually redeemable directly from the Funds. Each Fund issues and redeems shares on a continuous basis, at NAV, only in blocks of at least 50,000 shares ("Creation Units"), principally in-kind for securities included in the relevant Index.

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other information is in the prospectus which must precede or accompany this material. Please read the prospectus carefully before you invest. Distributor: Foreside Fund Services, LLC.

Shares are bought and sold at market price, not net asset value (NAV), and are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00 pm Eastern Time (when NAV is normally determined) and do not represent the return you would receive if you traded at other times.

There are risks involved with investing, including possible loss of principal. Concentration in a particular industry or sector will subject the Funds to loss due to adverse occurrences that may affect that industry or sector. The Funds risk not benefiting from potential increases in the value of underlying securities above the exercise prices of the written covered call options, and are subject to the risk of declines in the value of such securities. Each sector fund is subject to its own specific risk factors. See prospectus for specific risks regarding each Fund and sector.

An option is a contract sold by one party to another that gives the buyer the right, but not the obligation, to buy (call) or sell (put) a stock at an agreed upon price within a certain period or on a specific date. A covered call option involves holding a long position in a particular asset, in this case U.S. common equities, and writing a call option on that same asset with the goal of realizing additional income from the option premium.
